

Nobody , nobody knows

My asylum, my asylum

We are a , can't be exposed

Is in your arms

That's how it is, that's how it

When the gives heavy burdens

Far from the others, to each other

I can bear a tons

In the daylight, in the daylight

On your shoulder, on your shoulder

When the sun is shinin'

I can reach an endless sky

On a night, on a late night

Feels paradise

When the is blindin'

We could a universe right here

In the plain sight, plain sight

All the world could disappear

Like stars in hidin'

Wouldn't notice, wouldn't care

You and I burn on, on

Yeah, I need you near

Put two and two 'gether, forever, we'll change

That's we uncover, 'cover, 'cover
