Questions 1-10

Read the following brochure on ways to help the environment and answer the questions that follow.

**WAYS TO HELP THE
ENVIRONMENT**

Use Reusable Bags

Plastic grocery-type bags that get thrown out end up in landfills or in other parts of the environment. These can suffocate animals who get stuck in them or may mistake them for food. Also, it takes a while for the bags to decompose.

Whether you are shopping for food, clothes or books, use reusable bags. This cuts down on litter and prevents animals

Recycle

Many garbage disposal companies offer recycling services, so check with the company you use to see if they can help you get started! It is as simple as getting a bin and putting it out with your trash cans for free!

Another way to recycle is to look for recycling cans near trash cans. Instead of throwing recyclables in the trash with your non-recyclables, make a point to take an extra step to locate recycling cans around your campus.

Save Electricity!

Use energy-efficient light bulbs instead of regular bulbs. They last longer, which will save you a bit of money (every little bit helps on a college budget, right?). Make sure you turn off lights, the TV, and other appliances when you are not using them.

Lower your air conditioning or heat when it's not necessary. This is especially true for between seasons. Open your windows in the early fall or layering your clothes in the early fall.

Save Water

Turn off the faucet as you are brushing your teeth. Don't turn your shower on until you're ready to get in and wash your hair. Limit your water usage as you wash dishes. Changing old habits will be good for both the environment and your wallet!

Avoid Taking Cars or

Carpool When Possible

Cars are harmful to the environment. Taking public transportation, walking, or riding a bike to class are better options that help the environment and your budget, as well as getting some exercise in!

This is cheaper than driving alone and you'll be closer with friends!

Questions 1-5

Using the information in the brochure, answer each of the questions below.

No.	Description	Ways To Help The Environment
1.	Ahmad prefers to ride his bicycle to school every day with his friends.	
2.	School administration should provide recycle trash cans in the school compound.	
3.	The weather is quite cold so Liana turns on the fan instead of air conditioner.	
4.	Julie always brings her shopping bag every time she goes to the grocery shop.	
5.	The two sisters are washing the dishes but they are also trying to limit the water usage.	

Questions 6-10

Using the information in the brochure, complete the sentences using **not more than two words**.

Saving the planet sounds huge, doesn't it? And in essence, it is. But there are many ways we can do to help reduce the effect of years of abuse. Firstly, recyclable items should not be (6) in the trash. Think before you toss. Secondly, switch off your household (7) and electrical devices when not in use. By doing so, you will reduce your energy consumption and bills. Besides, choose carpooling as it offers a number of benefits. One of the benefits is it can cut commuting costs compared to (8) . Apart from that, do not leave the (9) running while brushing your teeth. Doing so for just 2 minutes could conserve eight gallons of water per day. Finally, it is also advisable to use (10) . Plastic bags can take up to 1000 years to decompose. Recycling plastic bags costs more than it worth and so, many recycling facilities will not take them, meaning they end up in landfills.
