

Addition and Subtraction End-of-Strand Assessment

Name: _____ Date: _____

1. Calculate the total.

2. Circle **three images** that add together to make 12.

3

1 mark

3. What is the sum of 7 and 11?

1 mark

4. Use the number line to find the difference between 8 and 15.

1 mark

5. Craig uses 80ml of orange juice. How much orange juice is left?

 ml

1 mark

6. Write 2 addition number statements to match the model.

$$\square + \square = \square$$

$$\square + \square = \square$$

1 mark

7. Count the money.

p

If you spend 30p, how much will be left?

p

2 marks

8. Use the model below to solve the calculation.

$$83 - 56 = \square$$

Tens	Ones

1 mark

9. The sunflower is 87cm tall. How many more cm does it need to grow to reach 95cm?

cm

1 mark

10. Circle two calculations that are incorrect.

$$48 + 4 = 52$$

$$100 - 70 = 20$$

$$94 = 84 + 10$$

$$32 = 36 - 4$$

$$15 + 5 = 20$$

$$77 - 51 = 26$$

$$27 + 15 = 40$$

$$63 - 18 + 45$$

2 marks

11. Calculate the total weight.

9g

27g

g

1 mark

12. Fill in the missing boxes.

$$\square - 20 = 51$$

$$3 + \square + 6 = 11$$

13. Check whether the subtraction calculation is correct or not by using an addition calculation.

$$\square + \square = \square$$

Is it correct or incorrect? Tick the box.

Correct

☐

Incorrect

☐

14. Fill in the table. Count the ones and the tens.

Tens	Ones
	
	
	9

How much is there altogether?

15. Do you agree or disagree? Explain your answer.

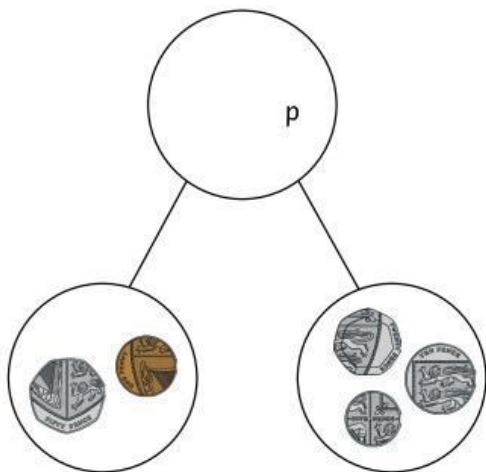

7 - 5 will have the same answer as 5 - 7.

16. Complete the missing values from the bar models.

2 marks

17. Complete the part-whole model.

1 mark

18. Look at the table. Circle two jobs that take a total of 37 minutes.

 Mopping the floor	12 minutes
 Hoovering	13 minutes
 Washing up	25 minutes
 Ironing	23 minutes

1 mark
