C. The passage below contains 10 errors. Identify and correct them.

- | | |
|--------------|--|
| Line 1..... | Edwin Hubble was an American astronomer who research led to |
| Line 2..... | discoveries about galaxies and the nature of the universe. He settled a |
| Line 3..... | long debate by demonstrating that the Andromeda nebula located outside |
| Line 4..... | our galaxy, established the islands universe theory, which states that |
| Line 5..... | galaxies exist outside of our own. His study of the distribution of galaxies |
| Line 6..... | resulted from Hubble's Constant, a standard relationship between a |
| Line 7..... | galaxy distance from the earth and its speed of recession. |
| Line 8..... | In 1925, Hubble had devised a classification system for the structure of |
| Line 9..... | galaxies and provided conclusively observational evidence for the |
| Line 10..... | expansion of the universe. His work pushed the one-hundred -inch Mount |
| Line 11..... | Wilson telescope beyond its capability and provided strong impetus for |
| Line 12..... | the construction of an instrument twice its size at Mount Palomar, where |
| Line 13..... | Hubble used during his last years of research. |
| Line 14..... | The telescope that bears his name was launching on a space shuttle in |
| Line 15..... | 1990 and obits the earth, collecting datum about the size of the universe. |

D. Give the correct form of the words given in capitals to complete the following passage.

Preserving (1. ORGAN) _____ in museum is one way of retaining them for posterity. But most people agree that it would be nice to keep a few of them alive in the wild, too. At the moment, which survive and which succumb is something of a lottery. WOLRDMAP, a computer program, can help by dividing the area of interest, those which are richest in species, into cells, and then examining the biodiversity of each cell. Planners would then be able to decide which areas are (2. ACCEPT) _____ for development on the grounds that they are areas of special scientific interest. WORLDMAP can also predict the (3. LIKE) _____ of a hitherto (4. OBSERVE) _____ species being found in an area on the basis of its known distribution. Given the (5. PATCH) _____ nature of most records, that is a useful trick. And it can select (6. COMPLEMENT) _____ areas for preservation. These are not (7. NEED) _____ the cells with the highest individual biodiversity, but rather those which, together, (8. MAXIMUM) _____ what is preserved by picking places with the least (9. OVERLAP) _____ species. How much notice the world will actually take of such (10. RECOMMEND) _____ is a different question

E. Fill each gap in the passage with ONE suitable word.

LAUGHING IS GOOD FOR YOU- SERIOUSLY

It is a sad fact that adults laugh far less than children, sometimes by as much (1) _____ a couple of hundred times a day. Just take a (2) _____ at peoples' faces on the way to work or in the office: you'll be lucky (3) _____ see a smile, let alone hear a laugh. This is a shame –especially in view of the (4) _____ that scientists have proved that laughing is good for you. “ When you laugh” says psychologist David Cohen , “it produces the feel-good hormones, endorphins . It counters the effects of stress (5) _____ enhances the immune system.”

There are many (6) _____ why we might laugh less in adult life: perhaps we are too work-obsessed, or too embarrassed to (7) _____ our emotions show. Some psychologists simply believe that children have more native responses, and as adults we naturally grow (8) _____ of spontaneous reactions. Luckily, (9) _____ , it is possible to relearn the art of laughter. In India, “ laughter clinics” have been growing (10) _____ popularity over the last few years, (11)

_____ to the efforts of Dr Madan Kataria, (12) _____ work has won him (13) _____ devoted following. Dr Kataria believes that his laughing techniques can help to strengthen the immune system and lower stress levels, among (14) _____ things. He teaches his patients different laughs or giggles to relax specific parts (15) _____ the body. In 1998, when Dr Kartaria organized a World Laughter Day at Bombay racetrack, 10,000 people turned up.

F. Read the article about robots. Choose the most suitable headline from the list A-I for each part of the article (1-7). There is an example at the beginning (0)

A. Falling Demand

C. Dependability

E. Near Perfection

G. Changing roles

B. Robot Stars

D. Inefficiency

F. Research

H. Hidden danger

I. Muscle Power

0. F

The most sophisticated Japanese robots, which have vision systems and work at very high speed, are still based on American designs. Studies of robots, particularly computer control software, are considered to be generally less advanced in Japan than in America or Europe.

1. _____

Although industrial robots were originally developed as devices for simply handling objects, today their commonest uses are for more skilled work like welding, spray painting and assembling components.

2. _____

In Britain, robot sales appropriately peaked in 1984, but have been decline ever since. This is partly because British wage rates are too low to make robots financially attractive and partly because engineers now have more experience with robots and are more aware of the difficulties of introducing them effectively.

3. _____

It has been calculated that a robot uses on average about 100 times more energy than a human to do an equivalent job.

4. _____

It is estimated that 20% of all comic book heroes in Japan are robots. This is an enormous number because comics are so popular that they make up a third of all material published in Japan.

5. _____

Until recently a 50 kg robot arm with the same reach as a human could only lift 1 kg. The latest 20 kg robot can lift 2 kg, but this is still no match for a human arm which weighs about 5 kg and can lift 50 kg.

6. _____

The reliability of robots is measured in their M.T.B.F or mean time between failures. This has risen from about 250 hours in the mid 70s to about 10,000 hours today (equivalent to working 18 hours a day for two years). One way robot manufacturers have increased reliability is to test every single component they buy, instead of the normal procedure of just testing a small sample.

7. _____

The biggest single benefit of introducing robots claimed by Japanese companies is that they increase quality control. Once programmed, their output is more accurate and consistent than human, who can get tired and bored .

G. Write the corresponding letter (A, B, C or D) in the box to indicate the best option to fill in each of the blanks.

WHAT WE KNOW ABOUT MUSIC AND THE BRAIN

Work on the human brain has indicated how different parts are centres of activity for different skills, feelings, perceptions and so on. It has also been shown that the left and right halves, or hemispheres, of the brain are (1) for different functions. While language is processed in the left, or analytical hemisphere, music is processed in the right, or emotional hemisphere. (2) of music like tone, pitch and melody are all probably processed in different parts of the brain. Some features of musical experience are processed not just in the (3) parts of the brain, but in the visual ones. We don't yet fully understand the (4) of this. The tempo of music seems to be (5) related to its emotional impact, with fast music often (6) as happier and slower music as sadder. It is the same with the major (7) rhythm of the body: our heart (8) quickens when we're happy, but slows when we're sad. Military music may have (9) from attempts to get us ready for (10) by using fast drumming to (11) our hearts into beating faster. Music is perhaps one of the most complex experiences the brain (12) with and it has become an absolutely (13) part of our rituals and ceremonies. It has power (14) language to (15) mood and co-ordinate our emotional states.
