Scientific Method Worksheets

Scientific Method

Cut out the rectangles on this page and past on the previous page

Ask a question

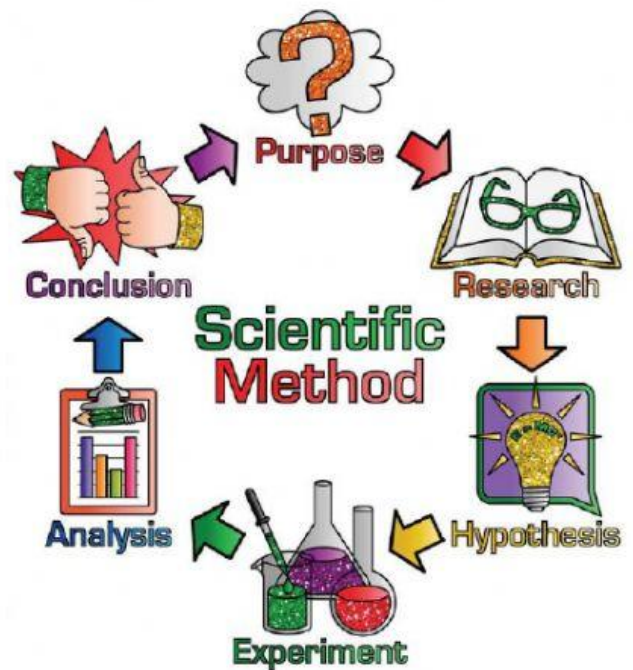

Use reliable sources to learn
background information

Prediction of what you believe will
happen

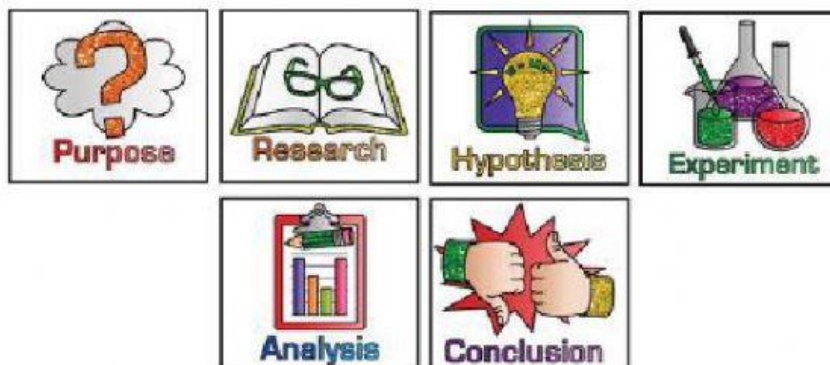

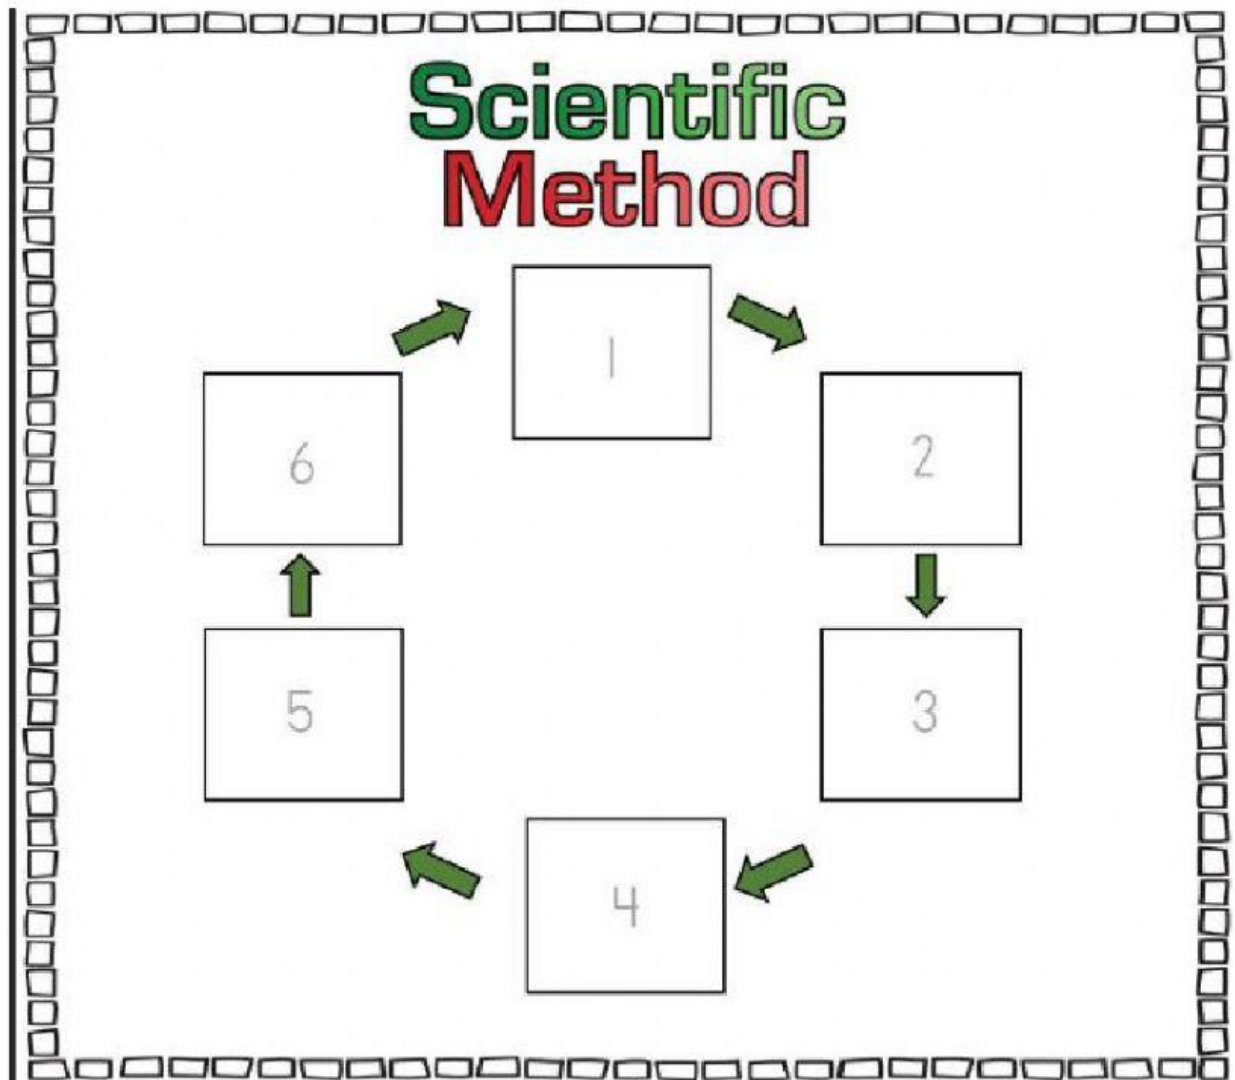

Test out the hypothesis and try to
answer the question

Collect all the data, record the
experiment and analyze the results

Determine what has been learned, answer
the questions and evaluate whether the
hypothesis was correct.

Put the right picture by the right number.

Explain in your own word your preparation to the experiment and your findings.
