

GEOMETRIC FIGURES

1) Which shape has three sides, is green, and medium-sized?

a) Triangle

b) Square

c) Circle

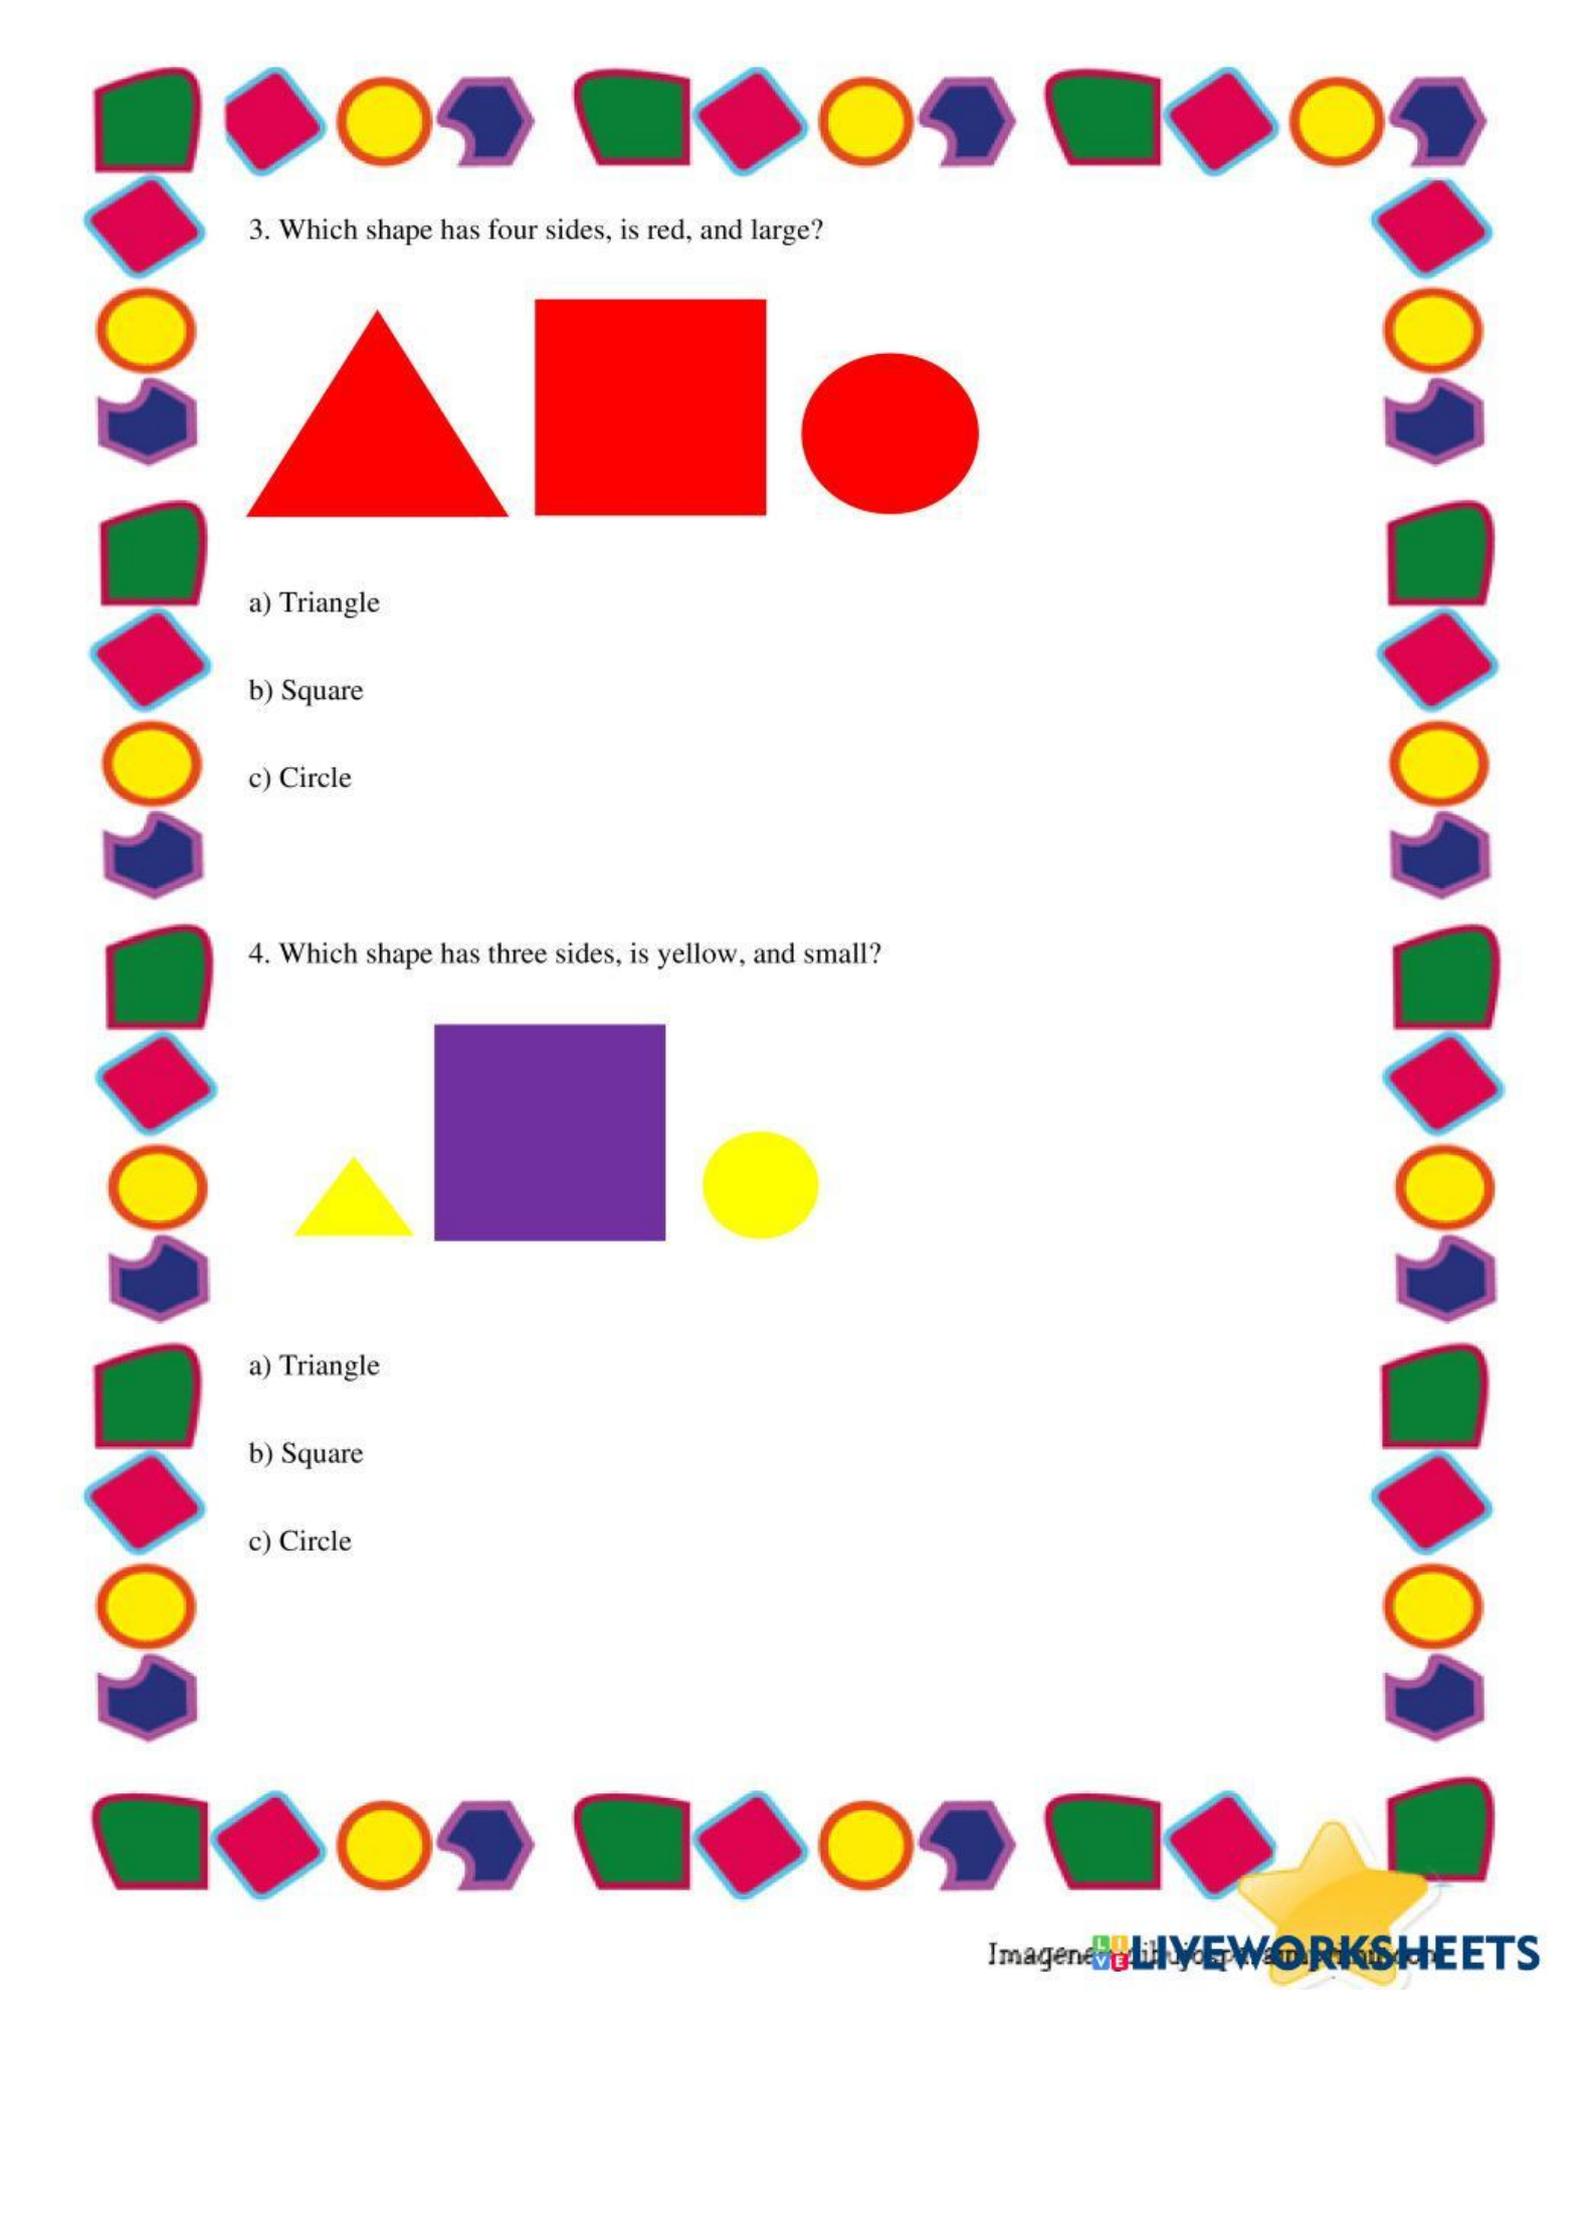

2. Which shape has no sides, is blue, and small?

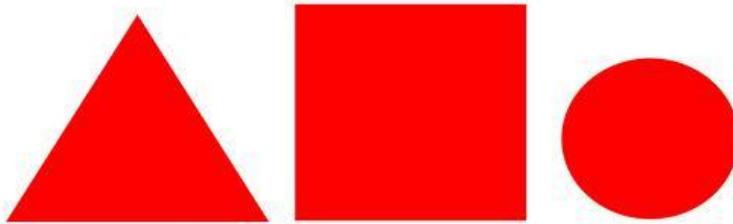

a) Triangle

b) Square

c) Circle

3. Which shape has four sides, is red, and large?

a) Triangle

b) Square

c) Circle

4. Which shape has three sides, is yellow, and small?

a) Triangle

b) Square

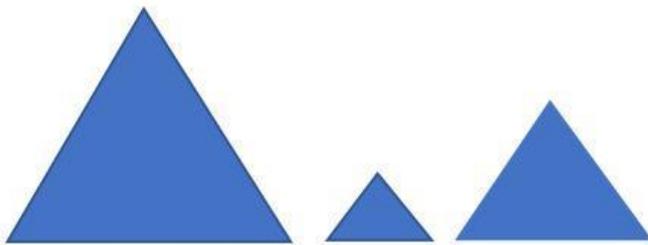

c) Circle

5. Which shape has no sides, is blue, and medium-sized?

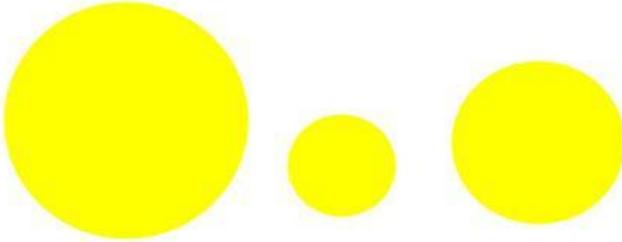

- a) Triangle
- b) Square
- c) Circle

6) What is the correct description of the figure on the right?

- a) Small blue triangle with three sides
- b) Big blue triangle with three sides
- c) Medium-sized blue triangle with three sides

7) What is the correct description of the figure in the middle?

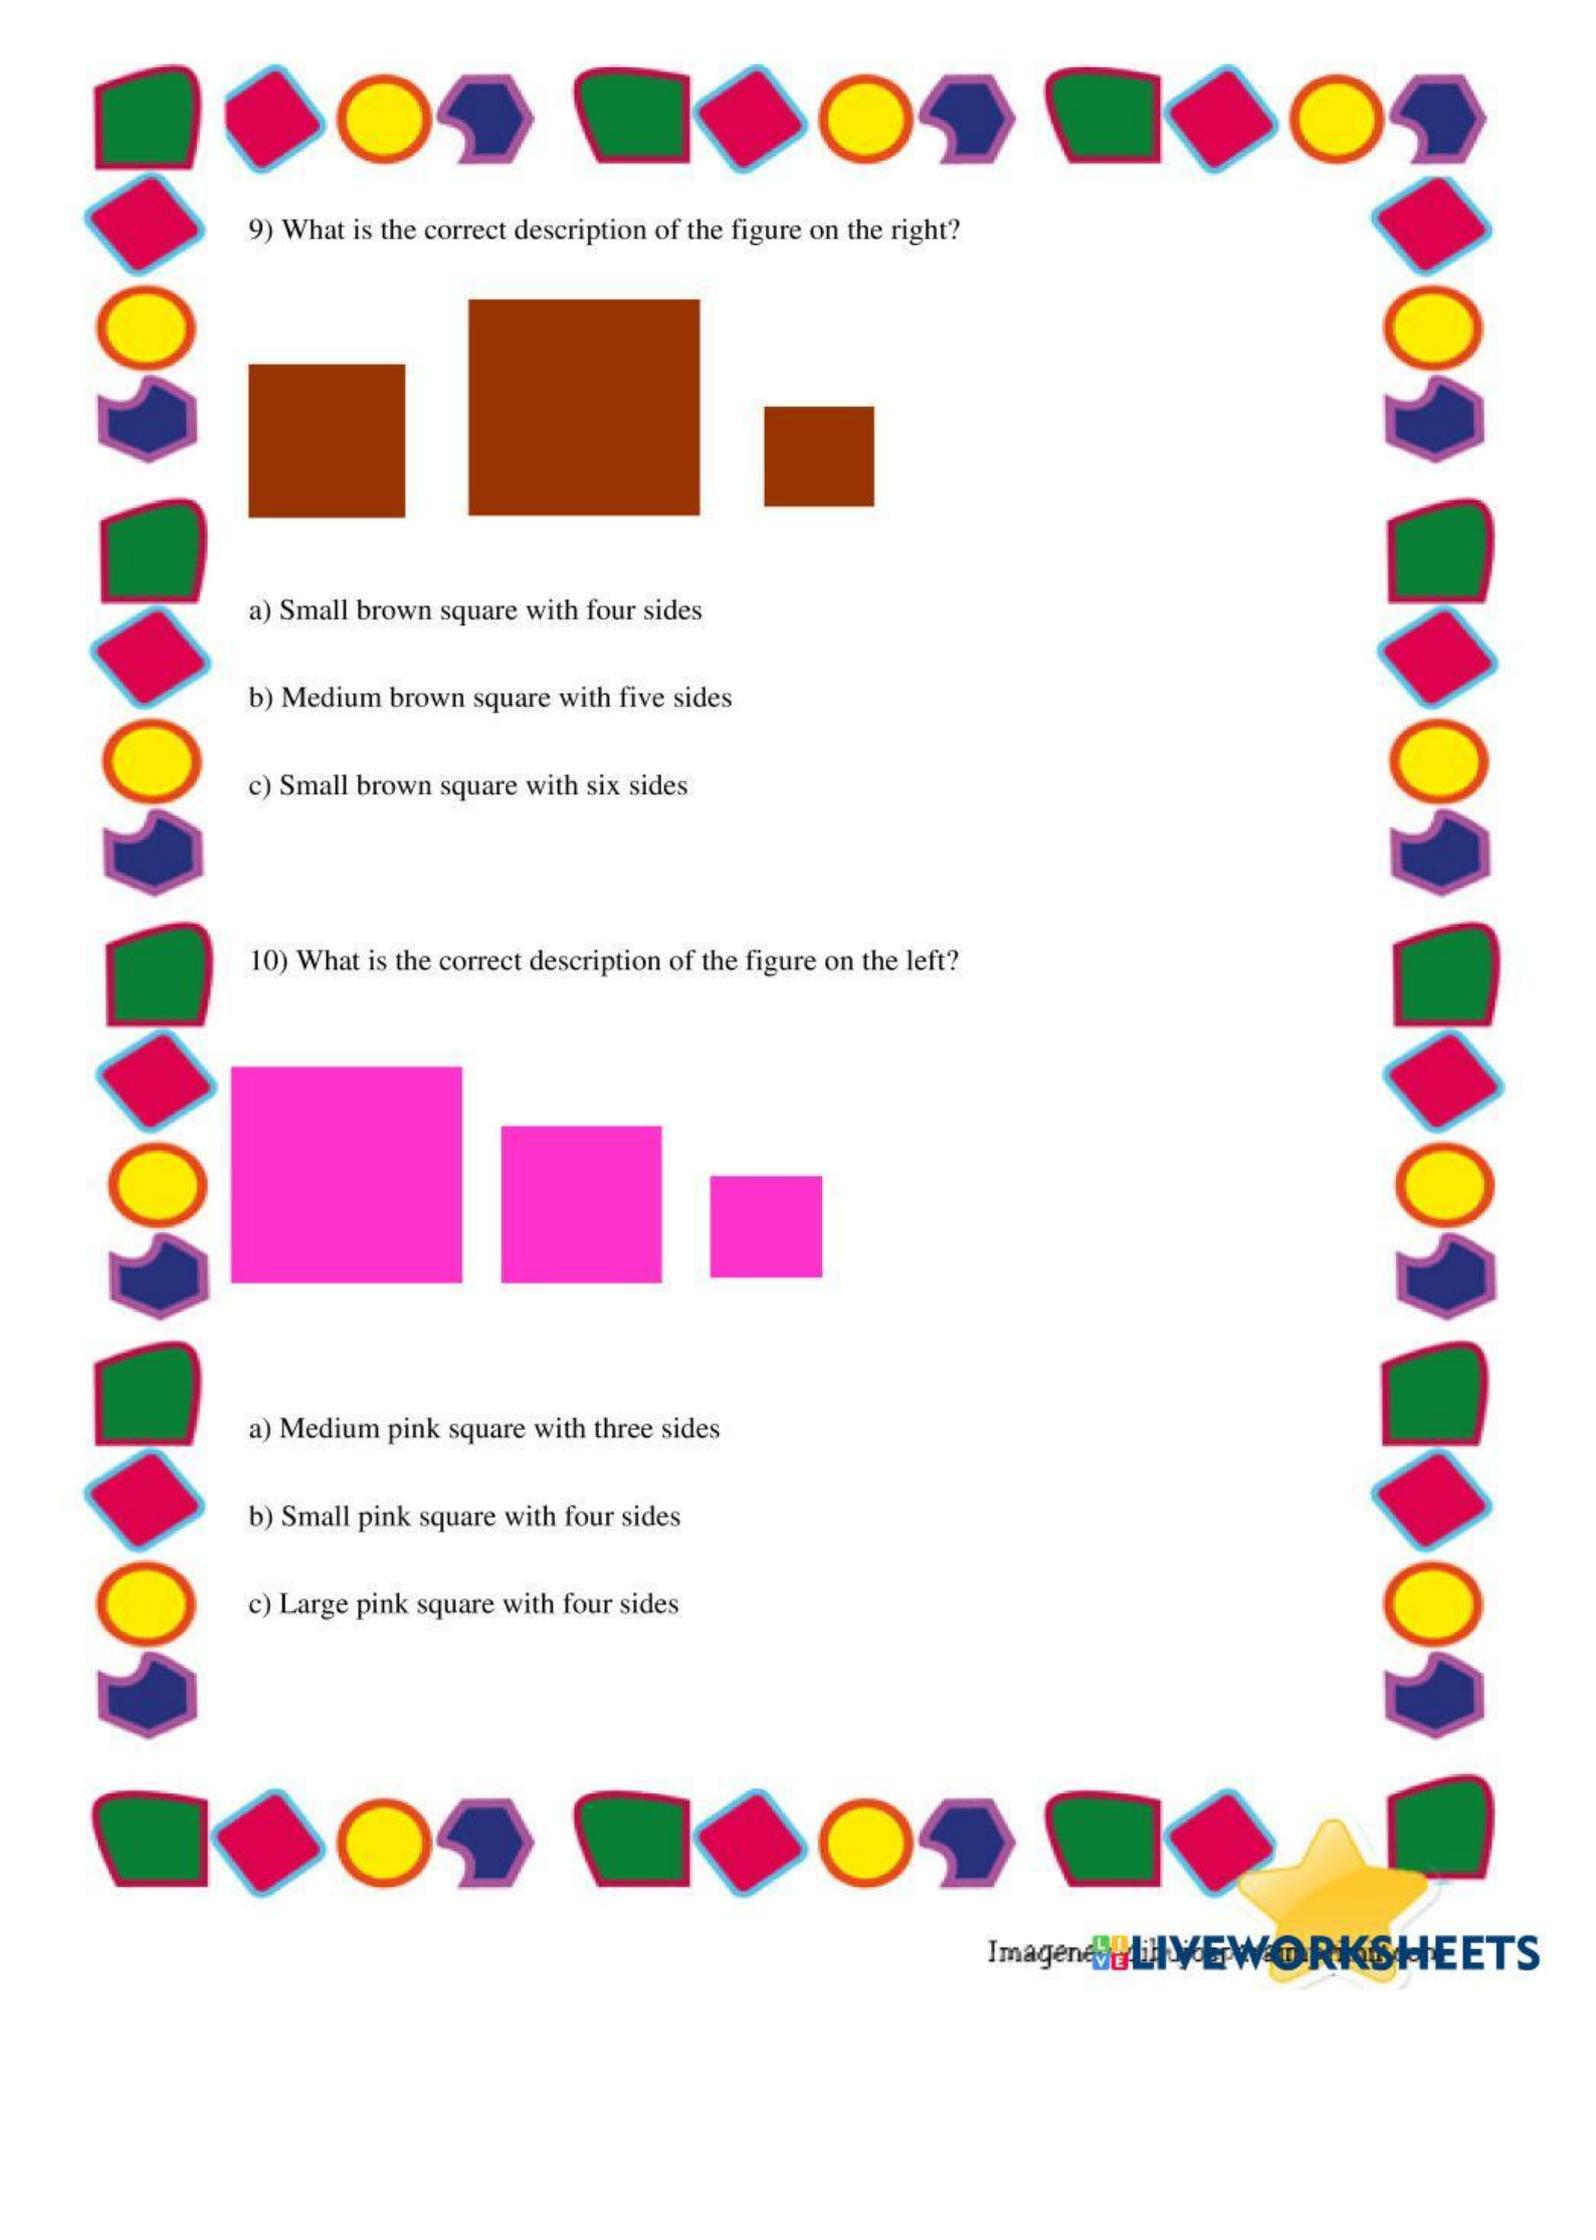

- a) Small yellow circle with four sides
- b) Small yellow circle with three sides
- c) Small yellow circle with no sides

8) What is the correct description of the figure in the middle?

- a) Large green triangle with four sides
- b) Medium green triangle with three sides
- c) Medium blue triangle with three sides

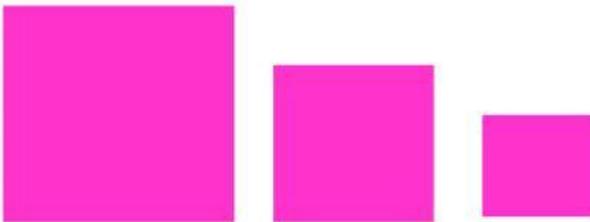

9) What is the correct description of the figure on the right?

- a) Small brown square with four sides
- b) Medium brown square with five sides
- c) Small brown square with six sides

10) What is the correct description of the figure on the left?

- a) Medium pink square with three sides
- b) Small pink square with four sides
- c) Large pink square with four sides
