Opinion	An opinion adjective explains what you think about something (other people may not agree with you). Examples: silly, beautiful, horrible, difficult
Size	A size adjective, of course, tells you how big or small something is. Examples: large, tiny, enormous, little
Age	An age adjective tells you how young or old something or someone is. Examples: ancient, new, young, old
Shape	A shape adjective describes the shape of something. Examples: square, round, flat, rectangular
Colour	A colour adjective, of course, describes the colour of something. Examples: blue, pink, reddish, grey
Origin	An origin adjective describes where something comes from. Examples: French, lunar, American, eastern, Greek
Material	A material adjective describes what something is made from. Examples: wooden, metal, cotton, paper
Purpose	A purpose adjective describes what something is used for. These adjectives often end with "-ing". Examples: sleeping (as in "sleeping bag"), roasting (as in "roasting tin")
