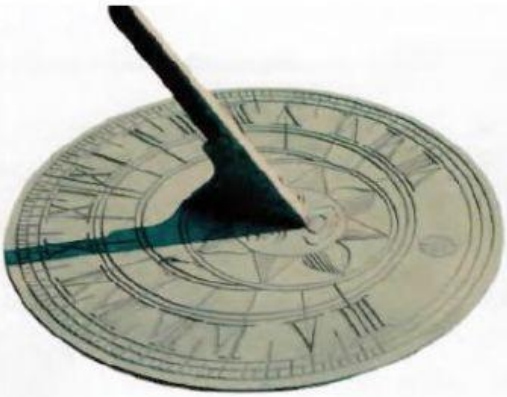
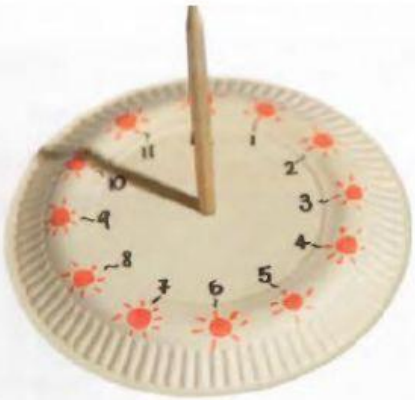
5th 2021 - How do we measure time?

Sundials

WILL to talk about future facts

1. **Complete the text about sundials with the correct future form of the verbs in brackets.**





A sundial is a very old kind of clock. It uses the sun to show the time. You can use a paper plate, a wooden stick, and some colored pens to make a sundial for your garden.

When your sundial is ready, you'll be able to tell the time and you [1] _____ (not need) a watch! When the sun shines on your sundial, you [2] _____ (see) a shadow on the sundial. When the sun moves, the shadow [3] _____ (move), too. At different times of day, the shadow [4] _____ (be) in different places.

The shadow [5] _____ (get) longer and shorter at different times, too. At noon, the sun [6] _____ (be) high in the sky and the shadow [7] _____ (get) shorter. In the late afternoon, the sun will be low in the sky and the shadow [8] _____ (get) longer. The shadows [9] _____ (not be) very long in the summer because the sun rises high in the sky in the summer. The shadows [10] _____ (be) longer in the winter because the sun doesn't rise very high in the sky in the winter.

2. **Read the text again and choose the correct answers.**

1 Will the shadow move when the sun moves? **Yes, it will. / No, it won't.**
2 Will the shadow be in the same place at different times of day? **Yes, it will. / No, it won't.**
3 Will the shadow get longer and shorter at different times? **Yes, it will. / No, it won't.**
4 Will the sun be low in the sky at noon? **Yes, it will. / No, it won't.**
5 Will the shadow be longer in the late afternoon? **Yes, it will. / No, it won't.**
6 Will the shadow be shorter in the summer? **Yes, it will. / No, it won't.**
