SUBORDINATORS AND TRANSITIONS OF COMPARISONS AND CONTRASTS

by Julian Conde

I. Write C if the sentence is correct and I if it's incorrect. Pay attention to punctuation.

1. **Just as** the sun provides warmth and light for the earth solar energy can be harnessed to generate electricity. ☐
2. **As** the cost of renewable energy technologies continues to decline, their use is becoming more widespread. ☐
3. **In the same way that** the internet has revolutionized communication and information exchange, blockchain technology has the potential to transform many aspects of society. ☐
4. Geothermal energy is only available in specific locations **whereas** solar power is a renewable energy source that can be used anywhere. ☐
5. **While** renewable energy technologies can help reduce greenhouse gas emissions they also require significant investment and infrastructure development. ☐
6. Electric vehicles still rely on electricity generated from sources such as coal and natural gas **while** they produce zero tailpipe emissions. ☐
7. Wind turbines require large areas of land and can disrupt local wildlife habitats **whereas** they can also provide clean energy. ☐
8. **Similarly**, both solar and wind energy are renewable energy sources that harness natural resources, such as sunlight and wind, to generate electricity. ☐
9. **In the same way that** solar energy can be harnessed to generate electricity wind energy can be used to power homes and businesses. ☐
10. **Likewise** biomass energy and geothermal energy are both forms of renewable energy that harness natural resources, but they use different processes to generate electricity. ☐
11. **In contrast**, to renewable energy technologies, traditional fossil fuels such as coal and natural gas are non-renewable and contribute to greenhouse gas emissions. ☐
