How to Write Notes for an Interview

When we interview somebody, we ask a lot of questions. It's difficult to write everything in the interview, so we take **notes**. When we write the interview later, we use our notes to write complete questions and answers.

- **how long lived our city?** → How long have you lived in our city?
  here 6 years → I've lived here for six years.
- 1 _____ → Have you ever lived in another country?
  2 _____ → No, I've never lived in another country.
