

Place the following Words in the spaces provided to correspond with the correct definitions.

Algebra	Coefficient	Exponent	Operation	Term
Base	Constant	Expression	Operator	Trinomial
Binomial	Equation	Monomial	Polynomial	Variable

Algebraic Representation used to indicate a quantity

The quantity or value that is known and remains unchanged.

The Number that is multiplied a certain number of times by itself.

A single term

A Mathematical Statement that compares two or more terms using an operator.

The branch of Mathematics that concerns itself with the behaviour and patterns of numbers

The symbol that represents an operation

The quantity or value that is unknown and changes or varies

An expression that has three terms

The co-multiplier of a term

An expression that has two or more terms

A Mathematical Statement that shows equality.

The process of performing a Mathematical or Arithmetic Calculation

The Number that indicates the number of times a number is multiplied by itself.

An expression that has two terms
