Presenting My School Apprentice Program

Good morning/afternoon everyone.

It's a pleasure to be with you today.

My name's (Muhammad Yusuf Sururi)

and I'm a XII (twelve Grade) Machinery Department student at SMKN 2 Jember.

And, my school apprentice program was located at (PT. Inti Daya Sejati Jember).

I am ready to report some points over the last 6 month school apprentice program.

I'm going to break down this report presentation into three parts:

First, the briefing week; second, the job sheets and finally, the report journal writing.

The first part of my presentation is the briefing week.

Before we went to the school apprentice industry place,

We should have joined a fully briefing program

which contained soft skills and some preparation for the school apprentice program.

This briefing program lets students do the rules and jobs in this school apprentice program.

The second is the job sheets we must have done in full - 6 (six) month - school apprentice program.

We must have had the experiences of the apprentice jobs relating to Electricity and Machinery jobs.

We must have attended every day workshop work like we attended the school day.

Finally, we completed the school program by writing a school apprentice program by fulfilling a journal report to track the jobs experiences and having a certificate to submit to school.

That's all my presentation of my school apprentice program in PT. Inti Daya Sejati Jember.

If you have any questions, please feel free to ask me some questions after my presentation.

Thank You
