Question 3. Turtles and snakes hatched out of 14 eggs. The baby creatures have 32 legs altogether. How many snakes are there?

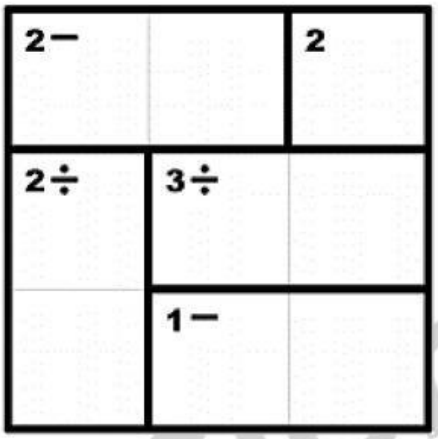

Answer: _____

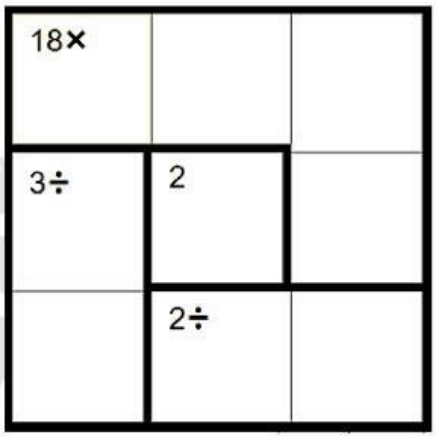

Question 4. Place the numbers 1, 2 and 3 in the boxes below.

Each row and column must have all the numbers 1, 2, and 3.

Each number only appears once in each row or column.

The numbers in that cage must combine (in any order) to produce the target number using the mathematical operation indicated.
