

Q.1:-complete the following :-

Displacement work force joule watt time zero

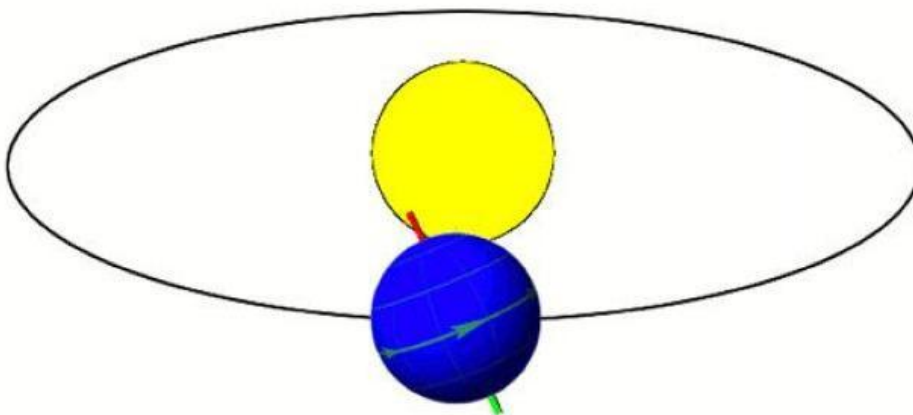

1- Work=..... ×

2- Work is measured in

3- Power=.....

4- Power is measure in

5- Work equals

Q.2: Choose the correct answer:-

1- If the effort force 4N and displacement 5m, Calculate work and power if the object displaced during 10 s

I. Work =

A. 9j B.20j C. 1j D. 1.25j

II. Power =

A. 200W B. 10W C. 2W D. 40W
