

1

Animal Eyes

A Duck

What do animals do with their eyes? They look for food. The duck looks for food in water.

The gecko has big eyes. It can see well at night. It looks for insects to eat.

A Gecko

A Crab

Eyes help to protect animals from other animals. The crab has two eyes on top of its body. It can see big animals, and then it can run away.

2

Parts of an Eye

Let's look at an eye. It has many parts. This is an elephant's eye. The eyelid and the eyelashes protect the eyeball. There are tears in the eye, too. The eyelid opens and closes, and the tears clean the eye.

The pupil lets light into the eye. This helps people and animals to see. When there's lots of light, the pupil is little. When there's no light, the pupil is big.

People have tears to clean their eyes. People cry tears when they are sad, too!

1 Animal Eyes
