turtle dove

Every year, hundreds of thousands of birds are killed as they make the long journey from Africa to Europe. Birds like turtle doves, nightingales, cuckoos and ospreys spend the European winter on the African continent and they return to Europe in the spring to make nests and lay eggs. In September, they leave again to fly back to Africa, where it is warm. Unfortunately, as these birds fly over the south of Europe and the sea north of Africa, many are shot and killed, even though these birds are protected by international laws. Some are eaten, but most are just shot for fun. This means that these traditional summer birds are becoming much more difficult to find in Europe and experts say that some are in real danger. We must stop this killing now!
