The world cup

It is summer and once again the finals of the World Cup competition are taking place. The world cup finals take place every four years, with the location of the competition alternating between Europe and America. There are twenty-four teams in the last stage of the competition this year and they are now playing in six groups for a place in the final on July 8th.

Millions of soccer fans all over the world are following the action on their televisions and radios. Thousands more are pouring into stadiums to watch their national teams play live. The excitement is growing as more teams are eliminated and a fortunate few advantage to the next round.

There is a lot of speculation about the eventual winners. The experts are predicting a European victory, Italy or Germany, because of the venue for the finals, but both Brazil and

Argentina are playing well enough to go all the way. Tickets for the last match are selling well and the whole world is waiting impatiently for July 8th and the new World Champions.

4. How many teams have reached the final?

- A. Twenty-four
- B. Six
- C. One

5. How many fans actually go to the matches?

- A. Millions
- B. Thousands
- C. Hundreds
