

Selesaikan setiap persamaan linear yang berikut:

a) $x + 5 = 7$

$x = \square$

b) $s - 7 = -9$

$s = \square$

c) $-4 + m = 6$

$m = \square$

d) $\frac{r}{4} = 3$

$r = \square$

e) $\frac{2t}{5} = -6$

$t = \square$

f) $2y = -14$

$y = \square$

Selesaikan setiap persamaan linear yang berikut:

a) $5w + 3 = 23$

$5w = 23 \square \square$

$w =$

b) $1 - 3w = -5$

$3w = -5 \square \square$

$w = \square$

c) $\frac{2}{3}x + 1 = -1$

$\frac{2}{3}x = -1 \square \square$

$x = \square$

d) $2(y + 2) = 16$

$\square + \square = 16$

$2y = \square$

$y = \square$

e) $\frac{2z + 3}{3} = 7$

$2z + 3 = 7 \square \square$

$2z = 21 \square \square$

$z = \square$
