

Technology may also be changing our brain patterns. Professor Greenfield, a top **specialist** in brain development, says that thanks to technology, teenage minds are developing differently from those of previous generations. Her main concern is over computer games. She claims that living in a virtual world where actions are rewarded without needing to think about the **moral implications** makes young people 'lose awareness of who they are'. She claims that technology brings a decline in linguistic creativity.

*Answer the questions below using NO MORE THAN THREE WORDS for each answer.*

1. According to Professor Greenfield, what kind of world do children occupy when playing computer games?

Your answer:

2. What does Professor Greenfield feel children don't pay attention to when playing computer games?

Your answer:

3. According to Professor Greenfield, what may be lower in teenagers who play a lot of computer games?

Your answer:
