

Mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each of blanks.

Peer-pressure is the influence that friends, people and individuals in group are capable of exerting on their peers. Sometimes adults underestimate the effects of peer pressure on (1) _____ because they were teenagers long ago in a different time. Here are three ways in which peer-pressure can negatively affect children.

First, due to peer pressure, children can (2) _____. For example, many may develop bad habits such as alcohol consumption, smoking, drug abuse.

Second, children's academic performance is also affected by their peers. For teenagers, it is important for them to be accepted by their peer group. This means that their peer group's approval gets placed above that of their parents and teachers. (3) _____. Sometimes their academics are affected because despite being capable of performing well, they choose not to because in the eyes of their peers it makes them look 'uncool'. Sometimes their academics are affected because in an effort to fit in with their peer group, they place more emphasis on being social rather than (4) _____.

Finally, negative peers also make children feel ashamed or (5) _____. At the average school, students come from various economic backgrounds. (6) _____, they end up feeling bad or ashamed of themselves and their family, because in the eyes of their peers, they are somehow 'lesser' or 'weird' individuals.
