TASK 1. Listening

Click on this to hear the audio!

Ricko: Safira, why do you bring a broom stick and .... (1) ?
Safira: My school will have Friday morning activity. All students, teachers, and all school members will have a clean program tomorrow.
Ricko : Doesn't your school have some cleaning officers?
Safira : We have some cleaning officers, but my school has had ..... (2) for several years before. My school is one of Adiwiyata schools in our city.
Ricko : That's great! By the way, what is Adiwiyata School?
Safira : Adiwiyata School is usually known well as green school. The school has a goal to have a green and ..... (3) so all students, teachers, and all school staffs have the same duty to keep the school's cleanliness and tidiness.
Ricko : That's great program. Your school really has a commitment to make a conducive school environment. By the way, what is the goal of the program to the students?
Safira: It is to introduce the students about how to keep the living environment well by cleaning the environment, planting some plants to get more fresh air, and separating and managing the waste. All of those activities can make the students realize that the school's cleanliness and tidiness are the crucial parts to get a conducive learning and ..... (4)
Ricko: Okay. What is the serious issue about your school's environment?
Safira: My school only has a problem about some small drains. They are usually full of dry leaves and some dry branches so the water can't flow well and resulted to the bad smell:
Ricko : Oh, I see. So your school must keep the drain clean. By the way, are there enough trash bins to put some garbage?
Safira : Of course. We have some trash bins. They are two types of trash bins. They are ..... (5) and unorganic trash bin.
Ricko : That's good waste management.

teaching process

organic trash bins

some plastic bags

healthy school environments

a cleaning and green program
