**C/ READING. (2 PTS)****Read the text and answer the questions.**

There are six main types of nutrients. Protein makes you strong. There is a lot of this in meat, fish, milk, eggs, beans and nuts. Carbohydrates give us energy. There are a lot of these in bread, pasta, rice and potatoes. Vitamins are important nutrients in the food we eat and you can find them in different types of food. People who don't get many of these in their food can get diseases.

Minerals are important for strong teeth and bones. You can find them in meat, fish, milk, vegetables and nuts. This nutrient has got the most energy and is good for our skin and hair. The fat in food such as butter, chocolate, chips, burgers and crisps is unhealthy, but the fat in food like olive oil, nuts and some fish is healthy.
