

Stars

Stars can look red, orange, yellow, blue, or white. The sun is a yellow star. You can see patterns of stars in the sky. The patterns are called constellations.

With a telescope, you can see more stars. The Hubble Space Telescope is a very big telescope out in space. It takes photos of stars.

The Hubble Space Telescope

LIVEWORKSHEETS

A Galaxy

A galaxy is lots of stars. There are many millions of stars in one galaxy. Our galaxy is called The Milky Way.

Old stars don't live for ever, but there are new stars, too!
