**5. What is one way to keep our memories strong as we get older?**

- a. Avoid learning new things
- b. Eat an unhealthy diet
- c. Exercise regularly
- d. Spend more time resting

## ARE THESE STATEMENTS T (TRUE) OR F (FALSE)?

1. Memories are stored in the brain through a process called long-term potentiation.
2. Older people with high levels of social interaction have faster memory decline.
3. Chronic stress can lead to a loss of brain cells.
4. Depression can make it harder to remember new information.
5. Eating well does not affect brain function.

## FILL IN THE GAPS

Memories are formed through a process of \_\_\_\_\_ (1)

Information first goes to \_\_\_\_\_ (2) then transferred to \_\_\_\_\_ (3)

\_\_\_\_\_ (4) is a process that helps store memories long-term

Age-related factors like \_\_\_\_\_ (5) can affect memory retrieval

Mental and physical health problems can interfere with \_\_\_\_\_ (6)

Chronic stress can lead to a loss of brain cells and affect retention of \_\_\_\_\_ (7)

Depression can cause memory problems due to low \_\_\_\_\_ (8) and lack of attention
