"Tell us about a subject that you like to study at school. Explain why you like to study it."

Science

I like studying science at school. It is fascinating to learn about how the world works. Science explains natural phenomena and helps us understand the environment. I enjoy doing experiments and discovering new things. The subject is always interesting and full of surprises. Science also encourages critical thinking and problem-solving skills. I like learning about different branches of science, such as biology, chemistry, and physics. Each topic offers something unique and exciting. Studying science makes me curious and eager to learn more. It is a subject that always keeps me engaged and motivated.
