Sixty percent have sleep-related problems every night. Maybe they can't fall asleep, or wake up very early, like at three or four o'clock. And 15 percent of adult Americans (19–64) and seven percent of Americans aged 13–18 sleep less than six hours on weekdays.

The poll shows a connection between sleep problems and screen time at night. Ninety-five percent of people in the poll use a screen at night. They don't relax. Young and old people watch television. People work at night and check their email. Young people play video games and text their friends. It's not relaxing.
