| | 4. Developed new weapons that allowed hunting from a distance |
| | 5. Developed new tools to dig the soil and plant seeds |
| | 6. Worked together and share jobs |
| | 7. Work in specialized jobs |
| | 8. Gatherer and also started growing plants |
| | 9. Began taming animals |
| | 10.Located areas around estuaries to live |

LIVEWORKSHEETS

Since early times, humans were looking to survive and adapt to new environments, they must learn how to work together learning activities such as growing plants, taming animals.

Early humans worked as hunter-gatherers or as farmers.

The hunter-gatherers' hunts animals like the ones in megafauna they also developed artifacts that allowed hunting and gathers wild plants to eat.

The farmers used to live in good climates with plenty water and started to learn how to grow plants and cultivate them.
