

New information must be connected to real-life situations or experiences.

Lessons should inspire students to ask questions, explore new ideas, and develop a love of learning.

Information is presented in a logical and well-organized way.

Collaboration with classmates and shared experiences promote deeper learning, as students learn from one another and develop a sense of belonging.

Lessons should encourage students to think critically, solve problems, and stretch beyond their comfort zones.

Students need to feel that their teachers and peers value their contributions and care about their well-being.

Link between different ideas, subjects, or experiences.

Encourage students to think outside the box, solve problems in innovative ways, and express their ideas in unique forms.
