A few years ago, a National Geographic Society poll revealed that 36% of Americans (about 190 million people) believe in aliens, while only 17% do not, and the remaining 47% are undecided. The figures may be surprising, but people have had an<sup>1</sup> \_\_\_\_\_ in aliens since the late 1940s. A<sup>2</sup> \_\_\_\_\_ in flying saucers, backed up by apparent<sup>3</sup> \_\_\_\_\_ of these alien spaceships in the form of grainy black and white photos, soon turned into an<sup>4</sup> \_\_\_\_\_, with people claiming to have actually made contact with beings from outer space. More recently, there has been an<sup>5</sup> \_\_\_\_\_ in this fascination with extraterrestrial life forms, thanks to detailed video footage 'proof' (created with high-quality 3-D computer software). It's hard to explain the<sup>6</sup> \_\_\_\_\_ for this continued fascination; to many people, there seems to be little<sup>7</sup> \_\_\_\_\_ between thinking UFOs exist and believing in magic. Perhaps it's just that we have always had the<sup>8</sup> \_\_\_\_\_ for a little mystery in our lives.
