

UNIT 5 REVIEW

Label the water bodies: ocean-river-lake.

Match each water body to the corresponding definition.

Lake

A huge, salty body of water that covers most of the Earth.

Ocean

A long, flowing stream of fresh water that moves across the land.

River

A big, still body of fresh water surrounded by land.

Label the pictures: hills, valleys, mountains.

Select true or false.

Volcanoes are big mountains that erupt and spew. True False

Active volcanoes don't erupt regularly. True False

Magma is liquid rock underground. True False

There are three types of volcanoes: active, dormant and extinct. True False

Match the volcanoes to their corresponding type.

Active volcano

Dormant volcano

Extinct volcano
