

## Surprises of the Sea

Our seas and oceans are full of fascinating creatures. Here are pictures of a few amazing marine animals along with some information about them. Can you identify these dwellers of the seas ?

1

1. Those tentacles look beautiful but are actually poisonous! And yet, clownfish live inside these, as we saw in finding Nemo.

3

2. This citizen of the oceans has a signature shape and a defining feature of a spiny exoskeleton.

5

3. Is that the long last sibling of an octopus ? Some of these can be as large as a cruise ship!

2

4. Lots and lots of holes and pores in this one. All that's missing are some square pants.

4

5. Another one that look pretty but is quite dangerous. It sounds like something you can eat but its sting can be fatal.

6

6. How, what a spiny thing that is. It's name comes from the Middle English term for 'hedgehog'.
