

NATURAL SCIENCE

≡ PARTS OF A PLANT ≡

1. Drag and drop the parts of the plant to the right place. Then, choose the right function for each.

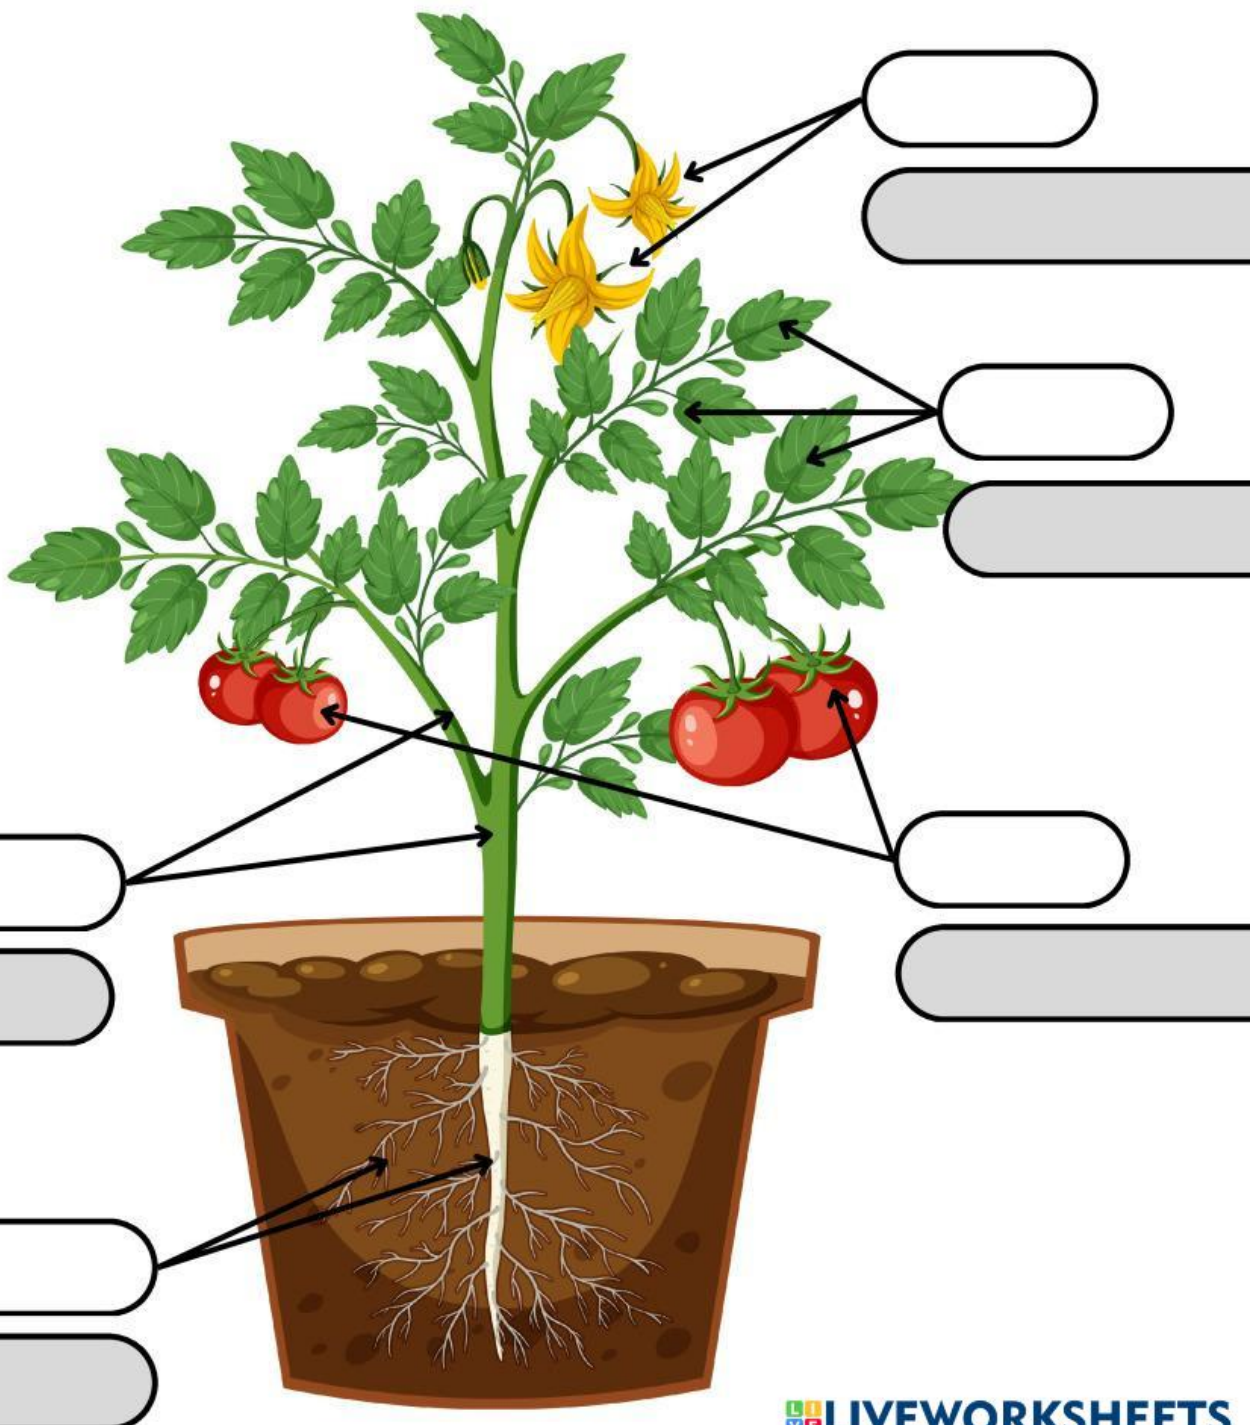

stem

flowers

roots

leaves

fruits

2. Match the drawings with the parts of the plant. Then, match each part with its function.

stem

It transports water and minerals to the leaves

flowers

They take water and minerals from the ground

roots

They make food for the plant

leaves

They can be many different colours..

Photosynthesis happens here.

They have got pollen.
