All Play and No Work Is Not Good for Children

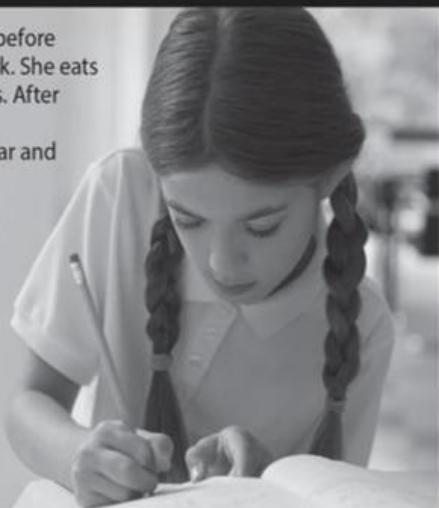

All Work and No Play Is Not Good for Children

All Sleep and No Play Is Not Good for Children

Eva is 12 years old. She gets up at 6:00 a.m. and studies for an hour before breakfast. She goes to school at 8:30 and comes home after 6 o'clock. She eats lunch at school and studies for an hour before her afternoon classes. After school on Monday, she has guitar lessons. After school on Tuesday and Thursday, she has Chinese class. After dinner, she plays the guitar and studies from 7:00 to 10:30. She usually goes to bed at 11:00 p.m.

What does Eva do on weekends? Does she have fun? She gets up at 8:00 or 8:30. But after breakfast, she plays the guitar from 10 a.m. to 1 p.m. Then she eats lunch and reads a book. She doesn't have time for fun on the weekends! She goes to bed early – she's *always* tired!

Eva's a very good student, but is she happy? Are children happy when they don't play? Doctors say "no." Many children study in the evenings and on the weekends. This isn't good and the children aren't happy. Children want free time! Doctors tell parents: "Make sure your children work AND play!"
