

"Tell us about a subject that you like to study at school. Explain why you like to study it."

Maths

I like to study math at school. Math is fun because it helps me think clearly. In math, I learn how to solve problems with numbers. I enjoy it when I understand the answers and get them right. It makes me feel smart. I like to do math because it is useful in real life. For example, I can use math to count money or tell time. My math teacher is also very nice and helps me when I don't understand. I practice a lot at home, and I like it when I do better on my tests. This is why math is my favorite subject at school.
