- 5 Read the description of this new gadget and complete the table.

Quadcopter – Drone

This gadget is the latest news in the world of photography! It may look like a small helicopter but it's definitely more than just that! Four small blades turn round and round and lift it in the air. There's also a camera attached to it. It's mainly used for taking pictures from high above. But, it's becoming more and more important because it's used to search for people in danger after natural disasters.
