UNIT 4

REVIEW SCIENCE

Name: ..... Course: .....

1 **Match each ecosystem from the first column to one of the two types of ecosystems from the second column:**

Lagoon	Aquatic ecosystem
Forest	
River	Terrestrial ecosystem
Meadow	

2 **Say whether the following statements are true (T) or false (F):**

- ☐ An ecosystem consists of the physical environment and the animals that live in it.
- ☐ The physical environment's main elements are water, soil and air.
- ☐ The animals that live in a particular ecosystem do not interact.
- ☐ Living things in an ecosystem only interact through competition.

3 **Explain what the different types of interaction between living things in an ecosystem consist of. Write an example.**

Competition: .....

.....

Mutualism: .....

.....

4 **Draw a food chain with the following living things: rabbit, eagle, grass, bacteria and fox. Write which one is the producer, the primary, secondary and tertiary consumer and the decomposer.**

LIVEWORKSHEETS

5 **Choose the things you can do to help protect the environment:**

- ☐ Do not litter in natural areas.
- ☐ Hunt animals for sport.
- ☐ Do not respect living things in nature.
- ☐ Start fires in the forest.

6 Match each definition in the first column to the words in the second column:

Similar individuals that can have fertile offspring.	Community
Individuals from the same species that live in a certain place.	Species
All the populations that live in a specific area.	Population
