Reading

You are going to read an article on the Metaverse as the future of tourism. Are these sentences true or false?

1. Travel through the Metaverse is still a long way into the future. _____
2. Headsets let users play video games by interacting in online surroundings. _____
3. Virtual Reality may cause users to need exposure therapy. _____
4. Traveling has been impacted by COVID-19. _____
5. You can talk to other people when traveling in the Metaverse. _____
6. Traditional tourism may suffer from the rise of the Metaverse. _____
7. You cannot get addicted to virtual reality. _____

Could the Metaverse Be the Future of Tourism?

Traveling in virtual reality

1. What if you could travel without leaving the comfort of your home? Well, this might not be such a distant possibility. Welcome to the Metaverse, a virtual reality combining the real and the digital world.
2. Video game developers were one of the first to explore virtual realities. Companies such as PlayStation were able to build headsets, enabling its users to enhance their experience by bringing the game to their surroundings. Players can feel inside the game, move around it with their own body, all without stepping foot outside their living room. Virtual Reality has been offered as a way to improve gaming, exercise, and even in exposure therapy against phobias. Now, it is debated whether tourism could be the next business to benefit from it.
3. Traveling can be expensive, and extremely tiring. Since COVID-19, many are worried about traveling in planes, and visiting crowded attractions. Through the Metaverse, travel can be made more accessible and safer by bringing your favorite locations to you, for a lower price. Now, you can be at the top of the Eiffel tower with just a few clicks, or row a boat through the channels of Venice without getting wet. The Metaverse allows you not only to see the destinations, but also to interact with other users there, making it more realistic, and allowing you to seamlessly connect to others around the globe through unique experiences.
4. It is truly an astonishing possibility, but what could be the downside to the Metaverse? Well, many are worried that this could be the end of traditional tourism. This would affect countries, hotels, and the jobs of millions in the industry. Furthermore, it could promote technological addiction, preventing users from experiencing the real world in a natural and organic manner.
5. What do you think? Would you rather travel virtually, or experience tourism the old-fashioned way?
