THE FIGHT TO WRITE

In the past, it was difficult for women to become successful writers because people did not think that women should write books. Women who wanted to publish books did not usually use their own names. In some cases, only the title of the book appeared on its cover; other female authors preferred to use a pen name or pseudonym. This is exactly what the Brontë sisters chose to do.

Charlotte Brontë was born on 21 April 1816. She was the third of the six Brontë children, but her mother died when she was only five. Her two older sisters died, so Charlotte was responsible for the three younger children: her brother Branwell and her two sisters Emily and Anne. Their father was a strict man and the four children had to be very quiet when he was at home. To entertain themselves, they invented an imaginary world and wrote stories and poems about it.

In 1846, the Brontë sisters paid a publisher to print a collection of their poems under the pseudonyms of Currer, Ellis and Acton Bell. They chose men's names which had the first letter of these own names. They continued using these pseudonyms when they published novels individually. *Jane Eyre* by Currer Bell, *Wuthering Heights* by Ellis Bell and *Agnes Grey* by Acton Bell were all published the following year. Charlotte's novel *Jane Eyre* was an instant success and it received excellent reviews until the critics began to doubt that it was written by a man. Once they realized that the writer was a woman, they began to find fault with the novel. But by then it was too late and people continued buying it.

Despite the problems facing women writers in the nineteenth century, the Brontë sisters became quite famous. Sadly, all three of them died in their thirties, so they could never really enjoy their fame. Today, their novels are read all over the world and they are considered to be classic works of English literature.
