

Control work №5

NAME:

DATE:

CLASS:

MARK:

I. Listening

Listen to some people talking about environmental issues. Then, match the speakers (1-5) to the statements (A-F). There is one extra statement:

Speaker 1	A. The speaker found a solution to his / her problem after talking to others.
Speaker 2	B. The speaker didn't like the idea of car-pooling at first.
Speaker 3	C. The speaker realized he / she had to do his part for the environment after watching a TV show.
Speaker 4	D. The speaker wants to do something for the environment but it is not easy for him / her.
Speaker 5	E. The speaker wants to join an environmental organization.
	F. The speaker does not think that the Earth will recover from the damage it has suffered.

Speaker 1	Speaker 2	Speaker 3	Speaker 4	Speaker 5

II. Vocabulary Fill in the gaps with the words from the list below. There are two words you do not need to use:

• breezes • endangered • generate • pollution • rescue • poverty • flood • global warming • occur •

- Because of _____ our planet gets hotter and hotter.
- The oil spill near Alaska in 1989 was the worst case of water _____ in history.
- Drought will _____ in the area when it hasn't rained for an unusually long period of time.
- There are a lot of _____ species on the planet.
- We say that people live in _____ when they don't have enough money to pay for their food or housing.
- I like light _____ which blow from the sea in the evening.
- I managed to _____ the drowning swimmer and quickly bring him to safety.

III. Make the right choice to complete the sentences:

- When you go to Paris, don't **miss / leave / waste** the chance to visit the Louvre.
- The survivors were shocked to know that the hurricane left their houses **on / out / in** ruins.
- The **massive / huge / heavy** rain caused a terrible accident on the road yesterday.
- The earthquake under the ocean can generate a violent **avalanche / flood / tsunami**.

IV. Grammar Put the verbs in brackets into **-ing form or infinitive (with or without to)**

- What can I _____ (**do**) to help you?
- Let's spend our weekend _____ (**shop**) downtown.
- Mark has decided _____ (**become**) a lawyer as his father.
- Don't let him _____ (**eat**) ice cream or he will get a sore throat.
- I would rather _____ (**have**) a rest in the Crimea.
- Olga stopped _____ (**look**) around her to understand where she was.

V. Reading. Read the following text and mark the statements **T** (true) or **F** (false):

We need energy to heat our homes, cook and clean for our families and for transport. It allows us to live a comfortable and easy life. However, if we do not use this energy properly we will soon run out. Luckily, there are things we can all do to help our planet and conserve our resources.

To begin with, much of the energy used at home goes to heating or cooling our homes. A simple way to help conserve energy is by lowering the thermostat by two degrees in the winter and raising it by two in the summer. By doing so, you will not only lower your heating bill, but you will also reduce the amount of carbon dioxide that enters the atmosphere.

Another way you can save energy at home is by buying energy-saving appliances. Appliances like washing machines and cookers use a great deal of gas or electricity to work. When shopping for new appliances, look for the energy-saving sticker; they might be a little more expensive to buy, but they help save energy, and in the end will help you save money on your bills.

A lot of energy is used by means of transport too. One of the many ways to achieve low energy usage is to leave the car at home and catch the bus or the train to move around the city. Fewer cars in the street means less traffic and it will not only help save energy, but it will also reduce the amount of air pollution.

In the end, it is up to every individual to take responsibility and change their daily habits. If everyone does their part, then we can help save energy and our planet's resources.

1 Energy makes our lives more comfortable.	
2 Energy is limitless.	
3 Everyone can participate in conserving energy and saving our planet	
4 Heating and air conditioning influence the amount of carbon dioxide released into the air.	
5 Home appliances do not need much energy to run.	
6 While travelling, the only way to save energy is to use public transport.	
7 You do not need to change your daily routine to save energy.
