

Fill in the blanks with the correct form of the verbs in brackets. Mind you, check whether what the sentences proposes:

- is something that is always like that, (type 0)
- is a probable outcome for the future, (type 1)
- is hypothetical or an improbable situation, (type 2)
- is trying to imagine that something from the past had been different (type 3)
- or is thinking about what things would be like now if the past had been different. (mixed conditional)

You may have a look at the chart which we used in class.

- 1) If the compass hadn't been invented, it \_\_\_\_\_ (be) difficult for sailors to discover America.
- 2) If Alexander Fleming hadn't discovered penicillin, lots of people \_\_\_\_\_ (die) nowadays.
- 3) If you \_\_\_\_\_ (take) penicillin, the bacteria in your infection dies.
- 4) If AI continues to advance, many people \_\_\_\_\_ (have) to look for a different job.
- 5) If I \_\_\_\_\_ (be) an inventor, I would patent my invention as fast as I could so that no one could steal it from me.
- 6) People \_\_\_\_\_ (get) out of shape if they \_\_\_\_\_ (stop) doing exercise because robots did everything for them.
