Present Simple vs Present Continuous

A Day in the Life of Emma

Emma **works** as a project manager for a technology company. She **starts** her day at 8 AM every morning and **checks** her emails first thing. She **usually has** a lot of meetings, but today she **is working** from home because she **is finishing** a report for an important client.

Right now, Emma **is talking** to her colleague Mark, who **is helping** her with the project. They **are discussing** how to present their findings in the upcoming meeting. Emma **knows** this project is important because the client **is considering** investing in a new software solution, and she **wants** to make sure everything is perfect.

Normally, Emma **does not work** from home, but because the report **is due** tomorrow, she **is staying** at home to focus. At the moment, she **is reviewing** the data one more time to ensure everything is accurate. In the afternoons, Emma **usually attends** team meetings, but today she **is focusing** entirely on the report.

1. What does Emma do for a living?
   - **Answer**: _____

   Present Simple *Present Continuous*
