

1. Revise the old words and learn the new ones.

Fraction	$\frac{1}{5}$	Whole	
Numerator	$\frac{1}{5}$ (with a red arrow pointing to the 1)	Half	
Denominator	$\frac{1}{5}$ (with a red arrow pointing to the 5)	Third	
Convert		Quarter	
Mixed number	$1\frac{4}{5}$	Improper fraction	Larger (or equal) $\rightarrow \frac{9}{5}$ Smaller (or equal) $\rightarrow \frac{2}{5}$

2. Convert improper fractions to mixed numbers. **Reduce where possible!**

Separate a whole with a space and type fractions with a slash (/). **Example: 1 2/3**

- | | | |
|-------------------------------------|-----------------------------|-----------------------------|
| 1) $\frac{63}{12} = 5 \frac{1}{4}$ | 2) $\frac{41}{6} =$ _____ | 3) $\frac{23}{7} =$ _____ |
| 4) $\frac{68}{10} =$ _____ | 5) $\frac{37}{5} =$ _____ | 6) $\frac{28}{6} =$ _____ |
| 7) $\frac{22}{7} =$ _____ | 8) $\frac{52}{8} =$ _____ | 9) $\frac{18}{5} =$ _____ |
| 10) $\frac{69}{11} =$ _____ | 11) $\frac{29}{4} =$ _____ | 12) $\frac{7}{2} =$ _____ |
| 13) $\frac{34}{5} =$ _____ | 14) $\frac{22}{6} =$ _____ | 15) $\frac{41}{9} =$ _____ |

NAME _____
GROUP **E2**

3. Convert mixed numbers to improper fractions. **Reduce where possible!**

Type fractions with a slash (/). **Example: 2/3**

1) $4\frac{9}{10} = \underline{49/10}$ 2) $7\frac{4}{9} = \underline{\hspace{2cm}}$ 3) $6\frac{3}{4} = \underline{\hspace{2cm}}$

4) $2\frac{1}{2} = \underline{\hspace{2cm}}$ 5) $7\frac{11}{12} = \underline{\hspace{2cm}}$ 6) $8\frac{5}{7} = \underline{\hspace{2cm}}$

7) $8\frac{1}{2} = \underline{\hspace{2cm}}$ 8) $3\frac{2}{3} = \underline{\hspace{2cm}}$ 9) $9\frac{1}{4} = \underline{\hspace{2cm}}$

10) $9\frac{1}{11} = \underline{\hspace{2cm}}$ 11) $4\frac{1}{2} = \underline{\hspace{2cm}}$ 12) $8\frac{2}{3} = \underline{\hspace{2cm}}$

13) $2\frac{1}{2} = \underline{\hspace{2cm}}$ 14) $4\frac{3}{4} = \underline{\hspace{2cm}}$ 15) $6\frac{8}{9} = \underline{\hspace{2cm}}$
