INPUT and OUTPUT DEVICES

Part 1.

1. Which of the following devices is primarily used for data input rather than output?

A. Monitor B. Printer C. Keyboard D. Speaker

2. What is the main function of an output device in a computer system?

A. To send commands to the processor

B. To convert digital information to physical form

C. To provide storage for data and programs

D. To display or print the results of data processing

3. How do input devices like the mouse help improve the user experience compared to only using a keyboard?

A. They allow for more precise control and navigation.

B. They provide a wider range of commands and functions.

C. They are easier to use and require less technical knowledge.

D. All of the above

4. When would a user typically prefer to use a printer over a monitor as an output device?

A. When they need a permanent physical copy of information.

B. When they want to view high-resolution graphics and images.

C. When they need to access information remotely from another location.

D. When they want to manipulate or edit the displayed content.

5. Which of the following statements about the role of computers is NOT supported by the video?

A. Computers require programming to perform any actions.

B. Computers can operate independently without user input.

C. Computers rely on input and output devices to interact with users.

D. Computers cannot do anything without being instructed what to do.

LIVEWORKSHEETS

6. Why are input devices considered the most familiar computer components according to the video?

A. They are the most complex and technical components.

B. They are the most expensive and high-performance components.

C. They are the components that users see, touch, and use most frequently.

D. They are the components that have the greatest impact on the computer's operations.

7. Which of the following is NOT a common function of a mouse as an input device?

A. Scrolling and navigating web pages B. Selecting and highlighting text

C. Saving and opening files D. Typing and entering text

Part 2.

1. Which of these devices is primarily used for playing computer games?

A. Keyboard B. Printer C. Joystick D. Webcam

2. What is the main purpose of a microphone?

A. To display information on a screen B. To record audio

C. To connect to a network D. To play sounds

3. Which device allows the computer to send and receive information over a network?

A. Speakers B. Modem C. Printer D. Joystick

4. What is the primary function of a webcam?

A. To record video B. To play audio

C. To send commands to the processor D. To connect to a game console

5. Which input device allows you to control the movement of a cursor on the screen?

A. Keyboard B. Printer C. Mouse D. Microphone

6. What is the main purpose of using a printer?

A. To record audio B. To display information on a screen

C. To print information on paper D. To connect to a network

7. Which output device is used to play sounds from the computer?

A. Keyboard B. Webcam C. Joystick D. Speakers
