

## FOR READ/WRITE LEARNER

**Please read the following text carefully and identify the generic structure of the text**

Climate change is a pressing issue that requires immediate action from all of us. The Earth's temperature is rising due to greenhouse gases, such as carbon dioxide, which are emitted from our daily activities, like driving cars and using electricity. If we do not change our habits, we will continue to contribute to this warming.

As the Earth heats up, we are witnessing significant changes. The melting ice in the North and South Poles is causing sea levels to rise, leading to potential flooding in coastal areas. Additionally, extreme weather events, including stronger storms, droughts, and heat waves, are becoming more frequent. If we ignore these warnings, the consequences will be catastrophic for our environment and our communities.

Climate change also poses a serious threat to our health. As temperatures rise, the spread of diseases becomes easier, and air quality deteriorates. It is vital that we take steps to protect our health and well-being by addressing the root causes of climate change.

We must all take action to combat climate change. This can include reducing our carbon footprint by using public transportation, conserving energy at home, and supporting renewable energy sources. By making small changes in our daily lives, we can collectively make a significant impact.

Countries around the world are beginning to collaborate on strategies to reduce greenhouse gases, but we cannot rely solely on governments. Every individual has a role to play in preserving our planet for future generations. Let us unite in this crucial effort to keep our Earth safe and livable.

**Please complete these task below by giving short answer!**

1. Climate change is a pressing issue that requires immediate action from all of us. The Earth's temperature is rising due to greenhouse gases, such as carbon \_\_\_\_\_.
2. The melting ice in the North and South Poles is causing sea levels to rise, leading to potential flooding in coastal areas. Additionally, extreme weather events, including stronger storms and heat \_\_\_\_\_, are becoming more frequent.
3. Climate change also poses a serious threat to our \_\_\_\_\_.
4. We must all take action to combat climate change by using public \_\_\_\_\_.
5. Let us unite in this crucial effort to keep our Earth safe and \_\_\_\_\_.
