

COLEGIO BILINGÜE NUESTRA SEÑORA DEL ROSARIO
SCIENCE AREA - THIRD GRADE

1. Identify each change of state of matter.

2. Identify in the following situations what state change occurs.

- Juan left an ice cream that his mother gave him in the sun, after a while he realized that the ice cream melted. What is the name of the state change that occurred?
- Juanita decided to make ice cream with mango juice, she placed the liquid in small containers and then put it in the refrigerator for six hours. What change of state occurred with the mango juice?

3. Look at the image and select the state change that occurred
