

EXERCISE OF EXPLANATION TEXT (SIMPLE PRESEN TENSE "VERBAL SENTENCES")

Fill in the blanks with correct answers by picking the verbs provided!

HOT SPOT 1		
S/ES	SUBJECT	DO/ DOES
X	They	Do
X	We	Do
X	You	Do
X	I	Do
✓	He	Does
✓	She	Does
✓	It	Does

Note: The trick of answering the questions bellow is
"VERB AGREEMENT". (Perhatikan penggunaan
verb dan subject yang mendahuluinya)

Flooding is a disaster which commonly (happens / happen) in large and densely populated cities. In Indonesia, **the floods** (hit / hits) Jakarta very often and (cause / causes) many victims. Then, do you know the process of how **flood** (happens / happen) ? Pay attention to the following explanation.

The process of natural flooding is preceded by **rain** which (falls / fall) to the surface of the earth. Then **the rain water** is absorbed by the ground surface and (flows / flow) to the lower place. Once **that condition** (happens / happen) , **evaporation and the water** (appear / appears) to the surface of the land. Flooding can be disastrous for humans when **floods** (happen / happens) in an area that people live because **the water** (carries / carry) along objects like houses, bridges, cars, furniture and even people.

On the other hand, the process of non natural flooding is usually caused by bad habits of humans who do not care about the environment, such as littering that can make water flow clogged. **This** (makes / make) **the water** deposited in landfills which gradually (becomes / become) more common. When water reservoirs can no longer hold water discharge, **the water** then (overflows / overflow) out the land and cause flooding.

Read carefully the text above and choose the best answer by clicking the option.

- What is the text mainly talked about?
 - The definition of flood
 - The division of flood
 - The flood as natural disaster
