Working Instructions

1. Write down the names of the group members
2. Read carefully
3. Do it right
4. Have fun working!

Garden Problem

Andi wants to make a rectangular garden. The length of the garden is 3 meters longer than its width. If the area of the garden is 40 square meters, what is the width and length of the garden?

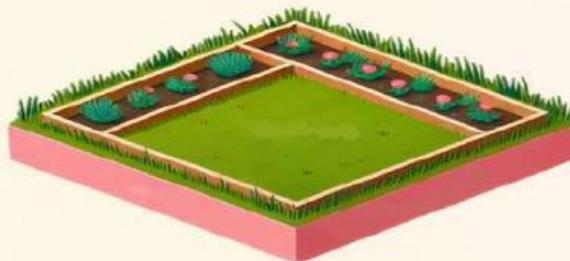

Do you think this problem can be formed in the form of a quadratic equation? then how do you find the length and the width of the side?

Garden Problem

Andi wants to make a rectangular garden. The length of the garden is 3 meters longer than its width. If the area of the garden is 40 square meters, what is the width and length of the garden?

Write Your Answer
