Activity

DOK 2: Differentiate between various types of networks.

A small network for personal devices, like a smartphone and laptop, within a few meters.

A network that connects devices in a limited area, like a home, office, or school, allowing fast data sharing.

A larger network that covers a city or campus, connecting multiple LANs over a wider area.

A network that spans large distances, like across cities or countries, connecting multiple LANs and MANs (e.g., the internet).

Activity

  DOK 3: Analyze the use of network types in various real-world applications.

 If a business in Dubai needs to connect its offices in multiple emirates, what kind of network would they use, and why?

Answer:
