DIGITAL CITIZENSHIP

A) A **digital citizen** is someone who uses technology responsibly, safely and respectfully.

B) To use technology responsibly and respectfully we must:

1. Don´t tell others our personal information.
2. Treat others with respect online. Do not be a cyberbully.
3. Be careful when downloading files or links.
4. Update software on your phone or computer.
5. Don`t damage the devices you use.
6. Keep learning about new technology.

C) Digital citizenship is important because it helps us to be safe and responsible online. It also helps us to treat others with respect online.

D) A **digital footprint** is like the information that you leave behind when you use the internet. It tells the **websites you visited**, the **pictures you shared**, and the **texts you wrote**. Just like footprints in the sand, your digital footprint shows where you've been online. It's important to be careful about what you share because it can stay on the internet for a long time!
