How are hippos and rhinos different? Read and choose.

@Squirrels: Hello, Kiwis. We love this topic and we're doing lots of research. Do you know that almost 10% of mammals are endangered? That's terrible!

@Kiwis: Thanks for the information, Squirrels. That is terrible. We need to help vulnerable and endangered animals. Which wild animals are you researching now?

@Squirrels: We're researching hippos and rhinos. These animals look similar, but they're very different. Rhinos are bigger and heavier than hippos. Some rhinos are more than four metres long. That's the same as a car! Rhinos are faster than hippos, too. But rhinos aren't fiercer than hippos. Hippos are very fierce. They sometimes attack humans. That's scary!

Choose the correct option.

1 Rhinos are [ ] than hippos.

2 Hippos aren't [ ] than rhinos.
